

Fall into something new this time of year, with a collection of challenges, tutorials and new tools to speed up your workflows. This month's collection of new design and development tools is sure to inspire you to try something a little different or add a new skill or tool to your repertoire. If we've missed something that you think should have been on the list, let us know in the comments. And if you know of a new app or resource that should be featured next month, tweet it to @carriecousins to be considered!

## #CODEVEMBER

November is #Codevember with a coding challenge for all designers this month. There's a new challenge each day—you can play catch up—that will help you stretch your creative muscles. Each day includes a code prompt. Create a sketch each day during the month, share (using #codevember) and browse other designs. You can also find it on Twitter. [https://twitter.com/codevember\\_](https://twitter.com/codevember_) This is year 2 of the project, with new creative challenges.
